other *.pdf files are source files provided in a pdf printable format.

Your optional "TO DO" list: (the documentation is already provided in the
===== master directory: ALIRE.pdf)

- 1- (I hope you have already generated kb7to8 and kb8to7)
Convert the file frdoc.tex and frenchlu.tex to 8-bit.
- 2- Then the commands: [frpdf]latex frenchlu
 makeindex -s fridx1.ist frenchlu
 [frpdf]latex frenchlu
would normally provide a readable complete French documentation,
i mean a [.pdf/]dvi file that could be previewed or printed via the
appropriate driver. This should normally provide the same
viewed file as ALIRE.pdf in the root directory.
- 3- Move frguide.pdf adn frldoc.pdf to the documentation directory
where you want the user find it.

Hope you enjoy it,

Bernard GAULLE
